

PRESS RELEASE

For immediate release

**We are now members of FCSI Switzerland
[Foodservice Consultants Society International].**

Nyon, Switzerland, October 18, 2024 – **Drinkotec is proud to announce that our company is now a member of FCSI Switzerland [Foodservice Consultants Society International].**

The Foodservice Consultants Society International (FCSI) was founded in 1979 to **support and promote the rapid development of the foodservice industry**. The association brings together professionals with a wide range of skills, including economists, marketing and service specialists, kitchen planners and foodservice management experts. Together, they strive to help investors and restaurateurs achieve lasting economic success.

Recognized as the world leader in hospitality innovation, Switzerland is the country where standards of quality, design and sustainability take root. Thanks to their expertise and impeccable service, Swiss professionals have forged an international reputation within the FCSI. In 1999, they founded the first local association, FCSI Switzerland, which continues to play a central role in the sector.

Being a member of this prestigious association is an immense source of pride for us. We warmly thank FCSI Switzerland for its trust and the opportunity to participate in its projects. We look forward to collaborating on future initiatives that share our values and bring real added value to the industry.

Sustainability is a promise for many – for us,
it's a reality.

Franck-Eric Flegbo, CEO of Drinkotec

###

ABOUT DRINKOTEC

Drinkotec is a Swiss company **specializing in beverage technologies**. We design and **manufacture software and vending equipment** aimed at reducing the use of plastic, improving CO₂ emissions per liter served, and reducing energy consumption in the sector.

Innovation, **sustainable consumption**, and simplified equipment management are at the heart of our daily work.

With 40 years' expertise in beverage dispensers, **Drinkotec knows the needs of the industry inside out**. Over the years, we've created a 360-degree ecosystem where **data is everything**.
